

## EDUCATION

---

- **University of Calgary** Calgary, AB  
*Bachelor of Computer Science* *Sep. 2020 – Apr. 2024*

## EXPERIENCE

---

- **Calgary Public Library** Calgary, AB  
*Student Intern* *Jun 2022 - Aug 2022*
  - TensorFlow is an open source software library for numerical computation using data flow graphs; primarily used for training deep learning models.
  - Apache Beam is a unified model for defining both batch and streaming data-parallel processing pipelines, as well as a set of language-specific SDKs for constructing pipelines and runners.

## PROJECTS

---

- **Pathfinding Visualization**  
*React.JS, SASS*
  - TensorFlow is an open source software library for numerical computation using data flow graphs; primarily used for training deep learning models.
  - Apache Beam is a unified model for defining both batch and streaming data-parallel processing pipelines, as well as a set of language-specific SDKs for constructing pipelines and runners.
- **Ticket System (Ongoing)**  
*React.JS, TypeScript, SASS, Auth0, Go*
  - TensorFlow is an open source software library for numerical computation using data flow graphs; primarily used for training deep learning models.
  - Apache Beam is a unified model for defining both batch and streaming data-parallel processing pipelines, as well as a set of language-specific SDKs for constructing pipelines and runners.
- **Schedule Viewer**  
*JS, CSS3, HTML5, JQuery, Django*
  - TensorFlow is an open source software library for numerical computation using data flow graphs; primarily used for training deep learning models.
  - Apache Beam is a unified model for defining both batch and streaming data-parallel processing pipelines, as well as a set of language-specific SDKs for constructing pipelines and runners.
- **Proxy**  
*C*
  - TensorFlow is an open source software library for numerical computation using data flow graphs; primarily used for training deep learning models.
  - Apache Beam is a unified model for defining both batch and streaming data-parallel processing pipelines, as well as a set of language-specific SDKs for constructing pipelines and runners.

## PROGRAMMING SKILLS

---

- **Languages:** Javascript, Java, TypeScript, C, SQL, Go    **Technologies:** React, AWS, Azure, Django, JQuery
